K. OF P. DEGREE WORK—Tonight at the lodge room the second rank will be conferred upon three pages by the Phoenix lodge of Knights of Pythias. It is desired that a large attendance of members be at the meeting to assist in the work.

TUCSON BUILDING UP—Vernon L. Clark yesterday returned to the city from Tucson, where he had been on private business. Tucson, he says, is enjoying considerable of a boom in a building line, many residences and a few business houses now being in course of construction.

PUT HORNS ON HIM—Last evening Dick Newton was led through the forest and up the rocky way out of darkness into light by the local lodge of Elks and today is sporting a fine pair of antlers, the whole world may know that he is a member of the organization of the best people on earth.

A ROUND OF INSPECTION—William Sippy, traveling conductor for the Randolph lines, arrived in the city yesterday morning from the north and will remain here some time. He is on his

SKIN ERUPTIONS

FOR 35 YEARS

Suffered Severely With Eczema All Over Body—Examined 15 Times by Government Doctor Who Said There Was No Cure—An Old Soldier Completely Cured.

A THOUSAND THANKS TO CUTICURA REMEDIES

"For over thirty-five years I was a severe sufferer from eczema. The eruption was not confined to any one place. It was all over my body, limbs, and even on my head. I am thirty years old and an old soldier, and have been examined by the Government Board over fifteen times, and they said there was no cure for me. I have taken all kinds of medicine and have spent large sums of money for doctors, without avail. A short time ago I decided to try the Cuticura Remedies, and after using two cakes of Cuticura Soap, two boxes of Cuticura Ointment, and two bottles of Cuticura Resolvent, two treatments in all, I am now well and completely cured. A thousand thanks to Cuticura. I cannot speak too highly of the Cuticura Remedies. John T. Roach, Richmond, Ross Co., Ohio, July 17, 1905."

100,000 MOTHERS
Daily Tell Other Mothers

That Cuticura Soap is the best baby soap in the world for cleansing and purifying the skin, and that Cuticura Ointment is of priceless value for soothing and healing itching, torturing, and disfiguring eruptions. A single application of Cuticura Ointment, preceded by a warm bath with Cuticura Soap, gives instant relief, and refreshing sleep for skin-tortured babies, and rest for tired mothers. Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle; dry without hard rubbing, and apply Cuticura Ointment freely, to allay itching and inflammation, and soothe the skin.

Cuticura Soap, Ointment, and Resolvent are sold throughout the world. Teller Drug Store, Chicago, Ill. Mailed Free. How to Cure Torturing Eruptions.

BARGAINS IN MEDICINE.

A woman once wrote us that she was not going to buy Scott's Emulsion any more because it cost too much. Said she could get some other emulsion for less money. Penny wise and pound foolish. Scott's Emulsion costs more because it is worth more—costs more to make. We could make Scott's Emulsion cost less by using less oil. Could take less care in making it, too. If we did, however, Scott's Emulsion wouldn't be the standard preparation of cod liver oil as it is to-day.

SCOTT & BOWNE, 409 Pearl Street, New York.

It was his first offense. The court believed him, and suspended sentence. Vicente Rubio, whose first offense it was not by a long way, had to pay a fine of \$7.

PIONEER ARIZONIAN.—Elijah Junior, familiarly known to his friends as Black Jack, is in Phoenix after a long absence. Mr. Junior is one of the old timers in Arizona, having been here almost since the whites began making history, and being nearly eighty years of age. He has spent many years of his life prospecting and mining in the Bradshaws.

MORRISTOWN MAKES GOOD.—Morristown, about forty miles northwest of Phoenix, is neither the largest nor the swiftest town in the county, but for its size it is equally as charitable and public spirited as any. Yesterday Secretary Van der Veer of the board of trade received from Morristown the donations of that village to the charitable work of caring for the San Francisco sufferers. The donation amounts to \$45.00 in cash, which Mr. Van der Veer will remit to the proper relief committee in San Francisco. There were eight contributors to the fund, and that is about as many permanent residents as Morristown has, though there are strangers passing through the station every day. The list of contributors follows: H. N. Cox, \$15; T. J. Hill, \$5; J. D. L. Verplanck, \$10; C. W. Barger, \$5; Thomas Crook, \$2.50; Frank Heffer, \$1.50; W. A. Barnes, \$2.50; Harry S. Bennett, \$5.

THE BONANZA MINE.—There is every reason to believe that the recent deal through which Dr. Martin and his brother, who lives at Harrisburg, have transferred the old Bonanza mine to E. T. Larson and associates of Michigan means the writing of another important chapter of mining history in those parts. The Bonanza is one of the famous mines of Arizona. Millions have been taken out of it, and yet it is the opinion of those who are in the best position to know that its largest bodies of rich ore have never been encroached upon. The property was first put on a paying basis by Hubbard & Bowers, who each made a competence out of it and then sold it to an English syndicate for a million and a quarter. The Englishmen may or may not have made money out of it, as stories concerning the management differ, but one thing all agree upon is that they developed no new ground in their operations, contenting themselves with working the ore already in sight. Then they sold the mine to a syndicate of low price, back to Mr. Hubbard, who, in turn, disposed of it to the Martin brothers and associates. The new company which has now secured the property proposes to work it on a large scale and in a modern way. The old forty-stamp mill is in good condition except for the repairs made necessary by long idleness, and the

ARIZONA LOGANBERRIES.—C. C. Chambers, who resides three miles southeast of Phoenix, in the truck-farming neighborhood known as the Wilson district, yesterday brought to the board of trade room a fine sample of Loganberries raised on his ranch. They look equally as large and luscious as the California fruit, and there was not nearly so much dust on them as on the berries shipped in. Secretary Van der Veer canned them and has them on exhibition, ready for display next fair time. This is the first fruit of this kind grown here, so far as is generally known. The canned dewberries sitting alongside look very similar, only they are of a darker color.

THE REDBIRDS.—Tonight, on the Diamond Jo, the juvenile band of the "Redbirds" will leave for Prescott, where they will tomorrow night appear in a concert in the Elks' theater. The organization is made up of twenty-five members and is under the leadership of Prof. Fountain. Since their organization they have made very rapid progress, and now make an appearance equal to many more pretentious organizations. The members of the band who will make the trip are: William Corpestein, Clarence Rode, Wilbur Fiske, Joe Bales, Earl Brady, Addison Brewer, Adam Fike, George Luhrs, Otto Thalheimer, Walter Thalheimer, Avery Corpestein, Richard Comfoot, Frank Eberle, George Eberle, Robert Gordon, Richard Fiske, Floyd Marshall, Walter A. Wood, Morris O'Neill, George Lount, Ernest Thalheimer and Frank Morris.

A SOLAR MOTOR.—People who desire to be careful and safe should keep their solar motors in the refrigerator when they are not working. In fact, the safer the country is to keep everything in the ice box except what it is in use. J. B. Edwards lives a few miles out Central avenue, toward the Arizona canal, and, like other Arizona farmers, does a little dairy business also. The other day he had a fine carpet hanging over a fence for a piece of burlap. Not far away he had laid the cover of a big milk can to dry after washing it. The sun turned loose a bunch of heat in that direction. It was reflected from the concave surface of the milk-can cover to the fabrics on the fence, and before anybody noticed what was going on the carpet and burlap had a big hole burned through it and the fence was on fire. To insure safety, it might be well, also, to put the fence in the ice box on warm days.

THE WAY OF THE TRANS GRESSOR.—The most remorseful man in town yesterday was Charles Waller. He arrived in Phoenix the day before with \$200, the savings of some months. He had his own idea of having a good time with so much money, and he proceeded to have it. Late night before last, he was found by the officers in a quarrelsome and dissatisfied mood. That is, he was executing a war dance to the disturbance of the public. He was locked up and yesterday he was brought before Justice Burnett who imposed a fine of \$7. Waller was without a cent and went to jail. P. Zapata was up for a disturbance of the peace. He admitted the charge, but urged that

No Tired Brains
when food is used.
Grape-Nuts
FACT!!!
Bread dyspepsia is common. It affects the bowels because white bread is nearly all starch, and starch is digested in the intestines, not in the stomach proper.

Up under the shell of the wheat berry Nature has provided a curious deposit, which is turned into diastase when it is subjected to the saliva and to the pancreatic juices in the human intestines. This diastase is absolutely necessary to digest starch and turn it into grape-sugar, which is the next form; but that part of the wheat berry makes dark flour, and the modern miller cannot readily sell dark flour, so nature's valuable digester is thrown out and the human system must handle the starch as best it can, without the help that Nature intended.

Small wonder that appendicitis, peritonitis, constipation, and all sorts of trouble exist when we go so contrary to Nature's law. The food experts that perfected Grape-Nuts Food, knowing these facts, made use in their experiments of the entire wheat and barley, including all the parts, and subjected them to moisture and long systematic warmth, which allows time and the proper conditions for developing the diastase, outside of the human body. In this way the starchy part is transformed into grape-sugar in a perfectly natural manner, without the use of chemicals or any outside ingredients. The little sparkling crystals of grape-sugar can be seen on the pieces of Grape-Nuts. This food therefore is naturally pre-digested and its use in place of bread will quickly correct the troubles that have been brought about by the too free use of starch in the food, and that is very common in the human race today.

The effect of eating Grape-Nuts ten days or two weeks and the discontinuance of ordinary white bread, is very marked. The user will gain rapidly in strength and physical and mental health.

"There's a reason."

mine is otherwise well equipped. However, the new owners have already bought a new cyanide plant and will put in a new tramway from the Golden Eagle claim to the Bonanza, where the mill stands. Furthermore, they expect to explore new ground, and altogether are confident the old Bonanza will again become more famous as a producer than it was in former days.

A GREAT MINE FIRE.
It Fortunately Caught Nobody at Work.

Trinidad, Colo., May 24.—A fire started late last night in the Engleville Mine, one of the oldest in Las Animas county, and it is learned from latest reports that all efforts to surround and smother it have so far been fruitless. The flames were first discovered in the seventeenth entry, which is one mile from the main entrance, and owing to the dense smoke which has filled the mine, it is next to impossible to fight the fire.

Smoke and gas have spread to the Starkville workings, which connect with the Engleville mine, compelling the suspension of work there. The Engleville mine is owned by the Colorado Fuel & Iron company, which controls vast interests in the coal properties of Las Animas county. About 300 men were employed in the workings that are threatened with destruction, but all had deserted the mine before any real danger was threatened.

Full and complete returns of the Nelson-Herrera fight will be taken at the Casino saloon Friday night, May 25. Seats for all under the fans.

The returns of the Herrera-Nelson fight will be received at the Hotel Adams bar tonight.

Returns of the Herrera-Nelson fight will be received at the Ford Hotel Grill room tonight. Public invited.

A reward of Fifty dollars (\$50.00) will be paid by The Salt River Valley Canal Company for information sufficient to warrant the conviction of any water user found interfering or meddling with any headgates of this corporation, through which it delivers water for irrigation.

The Salt River Valley Canal Co., Attest: LLOYD B. CHRISTY, R. E. MINER, Secy. Pres.

PROSPECTIVE SITE OF DIVERSION DAM

Extension Dam Approved—Increased Flow of Water.

Engineer L. C. Hill, Mrs. Hill and Miss Parks of Roosevelt are in the city for a few days, and will remain at least until Monday, and possibly longer. Mr. Hill came down to attend the trial of a liquor case that originated in the Roosevelt country, but it was postponed for the present. Incidentally, he is taking a general look over the work under his direction in the valley. The party stopped at Mesa Wednesday and Mr. Hill devoted the day to an inspection of a new road survey on that side of the river from Granite Reef to Desert Station on the Roosevelt road.

This survey, or proposed new road is a matter of considerable importance to the people of the valley, for it is another step in the direction of the securing of a permanent diversion dam. Though there has been no official announcement of the fact, it is the generally conceded intention of the reclamation service to construct a diversion dam just as soon as the proper site can be selected; and though that site is not definitely known to anybody yet, it is almost a certainty that it will be somewhere in that section generally and somewhat indefinitely described as Granite Reef. This proposed road is to be utilized when completed, for the hauling of cement from Roosevelt to the site of the diversion dam, and as laid out, the road will touch any desirable point along the river.

Learning yesterday that his presence would not be needed in court, B. A. Fowler and Dwight B. Heard arranged an automobile trip to Granite Reef and the Extension Road, with Mr. Hill as guest. They returned last night after a very strenuous, but a very profitable and at least a very satisfactory day. When seen at the hotel last night, Mr. Hill said the boring crew at Granite Reef was making good progress and recent results are gratifying. At no point have they found bed-rock clear across the river at less than 62 feet, but the latest borings have developed a narrow channel, heretofore, or rather, a narrower submerged gulch that will have to be bridged by the dam or anchored in the sand. The drill men have been set at work now, finishing the line of holes they were boring when the last big flood occurred, and their opinion is that it is already settled that dam is practicable, but what is desired now, is to discover the best place for it.

From Granite Reef the party continued its travels to the intake of the Extension, where Mr. Hill made an inspection of the work being done by the Arizona Canal W. U. A. under the direction of R. H. Collins. He pronounced the new rock dam as a very satisfactory structure and the building of it a fine piece of work for the amount of money expended. Mr. Collins is dumping about eighty cubic yards of rock on the intake each day now, and every yard of it means more water in the intake. The little railroad which transports the rock from the quarry to the dam also passes over a bed of sand and gravel which is easily loaded and used for puddling dam or chinking up the crevices between the larger boulders.

Yesterday morning there was a flow of 6200 inches in the intake and at about the same time the volume passing Evergreen measured 5100 inches. Mr. Collins felt sure that by Saturday night he would have a head of 8000 inches in the intake, and by the time the higher dam is completed there may be 10,000 inches. The third run of water over the Arizona lands will begin today and by Saturday or Sunday, it is expected the flow in the canal will be sufficient to fill every lateral simultaneously, when the water will be allowed to run just as long as any farmer can make beneficial use of it.

TODAY

A Tremendous Clearance Sale of LACES

Every yard of Oriental Lace and Insertion, every piece of Chiffon, Point Venise, Irish Crochet and Oriental Lace Yoking in stock included. All the new things for this Spring and Summer at prices beyond all possible competition. It'll be the most comprehensive sale of High-Grade Laces this city has ever known.

Here Are the Prices that Will Prevail

Our 15c and 20c Oriental Edgings and Insertions, yard 12c
Our 25c and 35c Oriental Edgings and Insertions, yard 19c
Our 45c and 50c Oriental Edgings and Insertions, yard 33c
Our 65c and 75c Oriental Edgings and Insertions, yard 49c
Our \$1 and \$1.25 Oriental Edgings and Insertions, yard 79c
Our \$1.50 and \$2.00 Lace Yokings today at, yard \$1.23
Our \$2.50 and \$3.00 Lace Yokings today at, yard \$2.19
Our \$3.50 and \$3.75 Lace Yokings today at, yard \$2.59
Our \$4.00 and \$4.50 Lace Yokings today at, yard \$2.98
Our \$5.00 and \$6.00 Lace Yokings today at, yard \$4.22

No accurate impression of the magnitude of this sale is possible without inspection right at the counters and tables. Come today. See the doings. The quality of the goods handled in this department is well known. Come—It'll pay.

A New Procedure in Our Ladies' Tailoring Section

\$6.95 For Latest Style Skirt Made to Your Order complete (exclusive of trimmings) from choice of any piece of white or colored linen in the house worth up to \$1.00 per yard.

\$14.45 For Latest Style Pony Suit, Eaton Suit or Shirt WAIST SUIT MADE TO YOUR ORDER, complete (exclusive of trimmings), from choice of any piece of white or colored linen in the house worth up to \$1.00 per yard.

The products of our Ladies' Tailor are beyond criticism—the height of artistic conception and faultless execution characterizes every garment that comes from this department. None more fashionable are produced in any city. We recognize the good work of his assistants, and to retain them during the dull period in dressmaking, to keep them employed, together with the purpose of reducing our stock of these fabrics, we have planned this great and attractive sale.

To Those Hard to Comprehend
we shall again explain—as follows: Beginning today we will have made to your order, complete [exclusive of trimmings] the latest style Suit or Walking Skirt at the prices named above. The garments will be guaranteed in every particular, best workmanship assured and prompt delivery given if orders are placed early.
